Hiring Manager
Johns Hopkins All Children's Hospital
St. Petersburg, FL 33701

Dear Hiring Manager,

I am writing to express my interest in the Data Analyst position at Johns Hopkins Hospital. As a recent Master of Business Analytics graduate from The University of Iowa, coupled with my hands-on experience in data analytics and business intelligence, I am excited about the opportunity to contribute to your esteemed institution!

During my internships at JP Morgan Chase & Co., I honed my skills in various processes including data cleansing, reporting, and creating analytical workflows – skills that align well with the requirements of your position. Notably, I executed a project that optimized reporting processes for the investment bank billing team, significantly reducing manual labor hours and enhancing data-driven decision-making. This experience plus the other internships that I have had have equipped me with the proficiency to transform complex data into actionable insights.

I am particularly drawn to this role at Johns Hopkins All Children's Hospital because of its commitment to using data for improving patient care and operational efficiency. My technical proficiency in tools like Python, SQL, Power BI, and Tableau, combined with my ability to simplify complex information, positions me to make a significant impact in your team.

I am eager to bring my background in data engineering, machine learning, and database management to your team and believe I would be a valuable asset. I look forward to the possibility of discussing how my skills and experiences align with the goals of Johns Hopkins!

Thank you for considering my application. I am looking forward to the opportunity to discuss how I can contribute to your continued success and innovation.

Best wishes,

Isaac McSorley
